## SUMMARY

Full Stack Developer with hands-on experience building production-grade MERN stack applications. MCA from Aditya University; interned as a Full Stack Developer at Technical Hub Pvt. Ltd, building Guards Hub, a platform used by the college's security guard department. Writes clean, structured code and adapts quickly to new tools currently strengthening DSA and system design fundamentals.

## TECHNICAL SKILLS

**Languages:** JavaScript, Python, SQL, HTML5, CSS3  
**Frontend:** React.js, Tailwind CSS  
**Backend:** Node.js, Express.js, REST APIs  
**Databases:** MongoDB  
**Tools & Platforms:** Git, GitHub, VS Code, Cursor, Claude Code, Codex

## EXPERIENCE

**Full Stack Developer Intern** | *Technical Hub Pvt. Ltd* June 2025 - July 2025  
– Contributed to Guards Hub, a security roster management system built for Aditya University, gaining hands-on experience translating a manual, spreadsheet-based process into a full-stack MERN application for 100+ campus security guards.  
– Learned to design and implement rule-based scheduling logic, building a shift assignment engine that auto-rotates General, A, B, and C shifts weekly with constraint validation, collision detection, and manual override handling.  
– Strengthened testing and debugging skills by performing integration testing across the shift engine, attendance tracking, and approval workflows, including edge cases like overlapping shifts, concurrent requests, and role-based access.

## PROJECTS

**Aditya University Visitor Management System (AUSVMS)** | *MERN Stack* [\[GitHub\]](#) 2025  
– Built a visitor management platform for Aditya University with four separate roles (Admin, Staff, Guard, Visitor), each with scoped views and permissions.  
– Implemented OTP-based visitor check-in, automated email/SMS alerts via Nodemailer and real-time live tracking using Socket.io.  
– Designed the Admin Dashboard analytics, visitor trend reports, and a full audit log.

**Guard Hub - Security Management System** | *MERN Stack* [\[GitHub\]](#) 2025  
– Architected and implemented a security roster management system for Aditya University in collaboration with Technical Hub, replacing manual spreadsheet-based scheduling for 100+ campus security guards.  
– Designed and built intelligent shift assignment engine that auto-rotates General, A, B, and C shifts on a weekly basis with constraint validation, collision detection, and manual override capabilities for edge cases.  
– Performed comprehensive integration testing across shift engine, attendance tracking, and approval workflows; conducted manual testing of edge cases including overlapping shifts, concurrent requests, and role-based access controls.

**Matrix Library Management System (Internship Project)** | *MERN Stack* [\[GitHub\]](#) Jun 2025 – Jul 2025  
– Led full-stack development of a production library management system deployed at Aditya University, serving 500+ students and 10+ librarians with simultaneous real-time operations.  
– Architected scalable MongoDB schemas and Node.js/Express APIs with JWT authentication, role-based access control, and aggregation pipelines powering admin analytics and reporting modules.  
– Integrated an AI-powered chatbot using NLP technology to autonomously resolve 70% of student inquiries regarding book availability and rack positions, significantly reducing librarian workload.  
– Deployed frontend and backend across Vercel and Render with GitHub Actions CI/CD, establishing monitoring and ensuring zero-downtime deployments throughout the internship period.

## EDUCATION

|                       |                                                                |                     |
|-----------------------|----------------------------------------------------------------|---------------------|
| Aditya University     | <b>Master of Computer Applications (MCA)</b> — CGPA: 7.70/10   | Aug 2024 – May 2026 |
| Aditya Degree College | <b>Bachelor of Computer Applications (BCA)</b> — CGPA: 7.24/10 | Aug 2021 – May 2024 |
