Summary

Full Stack and AI Engineer (MCA, 2026) who enjoys taking products from idea to release. Built and shipped Vesper, a Windows voice-to-action desktop app with pluggable cloud and local LLMs, and AUSVMS, a full-stack visitor management platform with role-based access, real-time updates and analytics. Looking for AI Engineer and Full Stack Developer roles.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
AI & LLM: LLM API Integration, Local LLMs, Whisper Speech-to-Text, Prompt Engineering, Model Context Protocol (MCP)
Frontend & Desktop: React.js, Electron.js, Redux, Vite, Tailwind CSS, shadcn/ui
Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, SQLite, JWT Authentication, RBAC, Socket.io
Testing & Tools: Jest, Vitest, Postman, Git, GitHub, Vercel, Render, AI-Assisted Development

Experience

Full Stack Development Intern June 2025 – July 2025
Technical Hub Pvt. Ltd. | *Guard Hub: github.com/Narayaaana11/Guards-Hub*

- Worked in a team on Guard Hub, a security guard management system for campus operations, building the security roster, attendance report and leave/OD management screens in React.
- Developed Express REST API modules (employees, roster, attendance, leave/OD, monthly reports) and handled end-to-end integration with the React front end.
- Tested the complete application with Postman, resolving 15+ integration issues before deployment.

Projects

Vesper - Voice-to-Action Desktop App 2026
Electron, React, TypeScript, Whisper, MCP, SQLite | *github.com/Narayaaana11/VESPER*

- Built a Windows push-to-talk assistant: hold a global hotkey and speak, and Vesper transcribes with Whisper (cloud or on-device) and uses native Windows helpers to detect the active window and type into any app.
- Designed a pluggable AI provider layer (Groq, Gemini, local Llama via Ollama, rule-based fallback) behind one interface, enabling dictation, drafting messages, terminal commands and opening apps by voice.
- Implemented a SQLite context engine with a privacy filter for sensitive text and a stdio MCP server; packaged a Windows installer with an update manager and shipped a landing site on Vercel.

Aditya University Visitor Management System (AUSVMS) 2026
React, TypeScript, Node.js, Express, MongoDB, Redis | *github.com/Narayaaana11/AUSVMS*

- Built a full-stack visitor management platform with a React + TypeScript (Vite, Tailwind, shadcn/ui) front end and an Express/MongoDB API, using JWT authentication and role-based access for admin, staff, security and visitor accounts.
- Implemented OTP-based visitor verification, real-time updates with Socket.io, and email notifications processed through a Redis-backed Bull job queue.
- Wrote MongoDB aggregation pipelines for analytics (peak hours, visit duration, trends) and scheduled PDF/Excel/CSV report exports; added Helmet, rate limiting, audit logging and Jest tests.

Matrix Library Management System 2026
React, Redux, Node.js, Express, MongoDB | *github.com/Narayaaana11/Matrix-Library-Management-System*

- Built a library platform with a React/Redux front end and an Express/MongoDB back end exposing 50+ REST endpoints, with JWT authentication and role-based access for admins and students.
- Implemented borrowing and rack-assignment workflows, activity logging, a Google Drive-backed digital library and Socket.io notifications.
- Added an AI chatbot using Google's Gemini API to answer library questions; deployed on Vercel and Render.

Education

Aditya University Aug 2024 – May 2026
Master of Computer Applications (MCA) – Computer Science *CGPA: 7.70 / 10*

Aditya Degree College Aug 2021 – May 2024
Bachelor of Computer Applications (BCA) – Computer Science *CGPA: 7.24 / 10*

Certifications

Full Stack Developer Certification | *Technical Hub Pvt. Ltd.* Jun 2025
Programming for Everybody (Getting Started with Python) | *University of Michigan (Coursera)*
Project Space Hackathon Participant | *Technical Hub Pvt. Ltd.* Jun 2025
